## TECHNICAL SKILLS

- Front-end Frameworks (HTML, CSS, JavaScript, React)
- Backend Frameworks (MySQL)
- UI/UX Design

## SOFT SKILLS

- Creativity and innovation
- Flexibility and resilience
- Cultural awareness and sensitivity
- Critical observation
- Interpersonal skills

---

## PROJECTS

### Word Search

2021

- I contributed to a project called "Word Search," where players are tasked with finding hidden words within a scrambled grid of letters. Once all the words are found, the game is cleared. The game was developed using Java, showcasing my skills in logic, design, and programming.

### Weather Map

2023

- I contributed to a project called "Weather Map," an application designed to provide weather updates for the user's location or any selected location on the map. The app was developed using Android Studio and programmed in Kotlin.

### OSAD ONLINE BOOKING SYSTEM

2023

- I contributed to a project called "OSAD Online Booking System," a platform designed for booking campus rooms for school-related purposes, such as events and sessions. This project was developed in partnership with OSAD.

### AI Annotation Tool and Classification System

2024

- I worked on enhancing the functionality of an existing annotation tool and was assigned to do the one of the system's primary features: the generation of radiographic reports.
